## HOW DO I SET UP & PLAY?

*Curiosity Spark - Can we turn liquid into a solid?*

- Help children place these ingredients into a tightly sealed sandwich sized bag, pressing the air out as you seal it.
- Place this bag within another one and seal tightly again.
- Half fill a large ziplock bag with ice cubes and add 6 spoons of salt.
- Place the smaller bag into this larger bag with ice cubes and salt then seal again.
- To make the ice cream you need to shake the bags for around 10 minutes so it's time to get moving and have some fun!
- Play tag, toss the bag to each other, relay races etc.
- When you see a solid icecream forming sit down and put small spoonfuls in a cup for each child to taste.
- You can double the recipe to make more but keep in mind you will need to shake for longer!

## WHAT MATERIALS DO I NEED?

- 1/2 cup heavy whipping cream
- 1 tsp vanilla
- 2 1/2 tsp sugar
- Sandwich and large size ziplock bags
- Bag of ice cubes
- Rock salt

### EXTENDING LEARNING SPARKS

- Provide individual bags and more ingredients so older children can measure and make their own ice cream in a bag.
- Make butter instead of ice cream by pouring liquid whipping cream into a glass jar or container and shaking again for 10 - 15 minutes until it forms a solid butter.

### WHAT MATERIALS DO I NEED?

- 1/2 cup heavy whipping cream
- 1 tsp vanilla
- 2 1/2 tsp sugar
- Sandwich and large size ziplock bags
- Bag of ice cubes
- Rock salt
